

## Membrane Cleaning System

# Water Tech

PowerClean™ brand Membrane Cleaning Stations from Haliant Technologies come in a variety of flowrates for cleaning and disinfection of any of our membrane based purification equipment. Sizes range from single 2.5" membrane units to multiple 8" membrane units.

Standard PowerClean™ systems are sized to correspond to the Hercules™, Halia™, Ultra™, and QualiPure™ membrane systems manufactured by Haliant Technologies, but are equally suitable for any membrane system from 150 to 500,000 GPD capacity

## Standard Features

- Polyethylene Tank
- 316SS Pump
- 316SS Cartridge Filter Housing
- Control Panel in Nema 4x Enclosure
- Powder-Coated Carbon Steel Skid
- Level Control installed in Tank
- Pressure Gauges
- Pipe Mounted Flowmeter

## Optional Features

- Heater installed in solution tank
- Quick disconnect fittings
- Heavy Duty Casters
- WYE-Strainer
- 316SS Skid
- In-Line pH Meter
