

# Fe, Mn, Scale, Corrosion Control

## RID-RUST

The **RID-RUST** family of proprietary treatment products is specially formulated to sequester and disperse problematic metals, minerals and hardness from potable water. RID-RUST provides clear, colorless water, protects pipelines, and improves disinfection efficiency.

**Application:** RID-RUST is provided as an easy to use liquid ortho-poly phosphate blend, with no dusting or strong acid fumes and vapors. RID-RUST sequesters Fe, Mn, and Hardness, typically at a required dosage of about 2 ppm.

### Properties:

Physical State	Liquid
Appearance	Clear, Colorless to Pale Yellow
Odor	Slight
Specific Gravity	Approx. 1.05 - 1.1
Water Solubility	Complete

### Benefits:

- **Sequesters Fe, Mn and Hardness. Controls Cu and Pb Leaching.**
- Increases Saturation and Precipitation Threshold.
- **Provides Dispersion, Scale and Corrosion Control.**
- **Reduces Chlorine Consumption** and Improves Chlorine Stability.
- Prevents Biofilm Regrowth to **Help Reduce THM Formation.**
