## Water, Wastewater & Sludge

### Organic Coagulants and Flocculants

**Water Tech** supplies a wide range of liquid and dry, anionic and cationic water soluble organic coagulants and flocculants to meet diverse water and waste water treatment needs in municipal, industrial, textile, mining, and other applications. We represent global leaders in the research, development, and manufacture. Our products include NSF certified polyamine, DADMAC, polyacrylamide and other organic coagulants and flocculants, and provide significant advantages such as Low Dosage Requirements; Broad pH and Alkalinity Operating Ranges; Reduced Sludge Volumes; and Improved Sludge Dewatering. Applications include ...

	Cationic PAM	Cationic Polyamine	Cationic Amine	Cationic DADMAC	Anionic PAM	Nonionic PAM
