

Grease Trap Treatment

Designed for application to various types of sewage and wastewater systems where large amounts of food oils and grease occur.

GT-1 is a specially formulated bacterial augmentation product for the institutional food service and hospitality industry, where large amounts of food and grease occur.

GT-1 is effective at reducing grease in grease traps, septic tanks, lift stations, cesspools, pipes and traps.

Significantly reduces the costs associated with high grease loads by biological degradation. **This product is most effective when applied at the end of the day when water use is at a minimum. Apply through floor drain, sink or directly into system.**

Grease Trap Treatment Features and Benefits

- prevents failed on-site systems
- effective, safe and economical
- contains Roetech bacteria
- enzyme free
- reduces grease trap pumping
- eliminates emergency service calls
- reduces sewer use surcharges
- ends back-ups and overflows
